

Quickly Inspect Your DOS Path

Goal: Find if a program or is in your %PATH%

Use this technique to inspect your DOS environment variables for specific strings using findstr.

- 1. Follow this example to see if perl is installed and your %PATH% environment variables is updated. First, open up a DOS window: Windows + R cmd Enter
- 2. Type in the DOS Window: echo %PATH% | findstr /i perl Enter
- 3. If perl is installed correctly, you should have it in your path.

4. You can also use this technique to find any environment variable. E.G., find if you have a temporary directory set:

set | findstr /i temp
