Changing the logo generated in GUI reports

Goal: Correctly access and change the logo displayed at the top of GUI-generated reports in your local Lanforge GUI.

It is possible to provide your own

logo and report header graphics.

1. Open your LANforge GUI, click on Reporting, and Reporting Manager

LANforge Manager Version(5.4.2) – 🗆											
<u>Control</u> <u>Reporting</u> Wind <u>o</u> ws	Info T	ests									
Print (Fit to Page)		Chamber <u>V</u> iev	v	<u>S</u> top Al		Restart	Manager		<u>R</u> efr	esh	HELP

Overview Generate Report Server Data Collection GUI Data Collection									
Report Input Data Dir:	Choose Directory								
Save Reports to Dir:	/home/dipti/html-reports	Choose Directory							
Report header:	images/report_banner-1000x205.jpg	Report Background							
	Report header image size: 1000 × 205 p×								
Report logo:	/home/dipti/Documents/x64_btbits/html/images/CandelaLogo2-90dpi-200x90-trans.png	Report Logo							
Max report logo size: 200 x 190 px									
		Report Defaults							
	<u>G</u> enerate Report								
Close									

3. Find a desired image instead of the default report logo that fits the report logo size (within 200 x 90 px size range) and save the image into the *html/images/* path within the *bt_bits* directory.

4. Once the desired image is within the appropriate images folder, scroll over back to the **Reporting Manager** tab, click on **Report Logo** and select the image (and image path) to be placed in the Report logo path. Then select **Report Logo**. Now, once a user generates a report, the new report should print out with a different logo at the top.
