Windows IP Addresses

**Goal:** Find and change network IP addresses on Microsoft Windows.

Here are some techniques for finding and setting IP addresses on Microsoft Windows using the Control Panel and the command line.

1. Find the IP Address of the Windows PC. There are two methods you can use:
   A. Using the Control Panel:
      1. Click Start, Run, control, [enter]
      2. Control Panel, Network and Sharing Center
      3. Network and Sharing Center, View network status and tasks
      4. Action Center, Review your computer’s status and resolve issues
      5. Search Windows Help and Support for “network status”
C. We click on our device, Ethernet 3:

D. Find and/or set the IP address; from Status, click Properties
B. Various DOS commands to find the IP addresses on the system:
   A. ipconfig and ipconfig /all
   B. netsh interface ipv4 show address

C. Resetting your DHCP address via command line:
   A. ipconfig /release
   B. ipconfig /renew
