CT704 LANforge-Attenuator with 4 Attenuator Modules: 0.7Ghz to 6Ghz

The CT704 RF Attenuator is used to attenuate (decrease) the RF signal between wireless devices. The CT704 uses 4 of the ATS0760-95 modules from EUBUS. A summary of the technical specifications is below:

<table>
<thead>
<tr>
<th>Specification</th>
<th>Value</th>
</tr>
</thead>
<tbody>
<tr>
<td>Impedance</td>
<td>50 Ω</td>
</tr>
<tr>
<td>Frequency Range</td>
<td>0.7 GHz – 6.0 GHz</td>
</tr>
<tr>
<td>Attenuation Range</td>
<td>0 – 95.5 dB</td>
</tr>
<tr>
<td>Attenuation Steps</td>
<td>0.5 dB increments</td>
</tr>
<tr>
<td>Insertion Loss</td>
<td>8 dB nominal, 10 dB max</td>
</tr>
<tr>
<td>Attenuation Accuracy</td>
<td>1-15 dB: ±1dB, 16+ dB: ±1.5dB or 4%</td>
</tr>
</tbody>
</table>

The CT704 may be controlled by the two knobs on the faceplate and may also be controlled through software access over the USB-Serial port. The included LANforge software suite supports automated scripting as well as manual configuration of the attenuator modules.

The CT704 has no moving parts and will fit into a small travel bag or briefcase for easy portability.

The CT704 includes 8 RP-SMA Plug to RP-SMA Plug patch cables, USB Cable, and external power supply (brick).

NOTE: This product may have a different hardware configuration than the system pictured above. Refer to your official quote for details.
Quick Start Guide

1. Connect 9v 1A DC Power brick.
2. Optionally: Connect USB cord to Linux PC for managing through LANforge or other program.
3. Connect the Attenuator pairs: Top SMA connector to one system, bottom to the other.
4. Adjust menu with top knob to 'All' or individual modules and use bottom knob to adjust

The LANforge attenuator sits between two RF systems (often WiFi AP on one side and WiFi Station on the other. Connect shielded RP-SMA Plug cables between the Attenuator and WiFi Stations. Adjust the attenuations as desired using Attenuator knobs and/or use a program to adjust the values over the USB-Serial connection.
attenuation settings.

Software Features

Hardware Specification

1. RF Attenuator with 0.7Ghz to 6 Ghz.
2. Includes 4 ATS0760-95 RF Attenuation modules from EUBUS.
4. USB-Serial console (115200 8 N 1) for scripting and automated control.
5. 2 rotating knobs for manual adjustment.
6. LCD Screen for display of current settings.
7. High-Quality aluminum chassis with extruded body and 2.4mm thick faceplates.
8. Internal RF connectors are highly shielded semi-rigid SMA cables.
9. +9v 1AMP external power supply (brick). May also be powered from 500ma USB port.
10. Weight: 3 lbs or 1.4 kg.
11. Dimensions: 9 x 9.5 x 3 inches  Metric: 240 x 230 x 80 mm.
12. Operating Temperature: 0 ~ 40°C.
13. Operating Humidity: 10 ~ 90%.
14. Certification: RoHS.
