LANforge 5.4.7 Released!

TR-398 Wifi Testbed

The TR-398 test plan qualifies the performance of WiFi APs. CandelaTech LANforge provides an automated solution.

Large Venue Wifi Testbed

Stadium networks handle thousands of users. Candela LANforge systems can do large scale over the air testing.

WiFi Mesh Testing

Emulate mesh node areas with isolation chambers while LANforge emulates clients stations. Use graphical controls to emulate physical distance.

Mass Transit WiFi Mesh

Test WiFi coverage for a transportation system. LANforge emulates hundreds of roaming users in small spaces for long duration.

Testing Internet Gaming

Isolate and test one network variable at a time, all emulated by LANforge: RF stability, RF performance, and upstream network conditions.
